

## UX UI Designer

### About me

I am a very curious and innovation-driven UX UI designer with a great love for art and new technologies.

In my last work experiences, I specialized in the design of data visualization and data dashboard but also B2C products with an e-commerce component.

My daily mission is transforming very complex user flows into a clean, smooth, and pleasing user experience.

I firmly believe that the user experience is the center point of my designs and to achieve a user friendly design, I use the user-centred design methods.

When I am not designing you can find me in the mountains hiking or climbing and enjoying my outdoor life in Squamish.

 Squamish, Canada
